Re: WT Docket No. 03-103
Ex Parte Presentation

Dear Ms. Dortch:

On October 25, 2004, Lawrence Krevor and I of Nextel Communications met with Paul Margie, Spectrum and International Legal Advisor to Commissioner Michael J. Copps, to discuss the serious threat of interference that the proposed wideband Air-to-Ground (ATG) service will create for public safety, specialized mobile radio, and cellular A and B operations in the 800-900 MHz bands. A copy of our presentation is attached.

While reform of the ATG bands may be feasible, numerous parties, including Nextel Communications, the Association of Public-Safety Communications Officials, International (APCO), and the Cellular Telecommunications and Internet Association (CTIA), have stated that wideband ATG may lead to unacceptable adjacent-band interference in the 800 and 900 MHz bands. Before adopting a service-rules order in the ATG docket, therefore, the FCC must develop a public record sufficient to permit thorough study and evaluation of the adjacent-band interference problems that wideband ATG is likely to create.

Under section 1.1206(b)(2) of the Commission's rules, 47 C.F.R. § 1.1206(b)(2), please associate this letter with the above-referenced docket.

Sincerely,

/s/ Trey Hanbury

Trey Hanbury
Senior Counsel
Nextel Communications

CC: Paul Margie
